Topic #5 - Driver Handheld License Document App

Beginning in 2021, ABF road and city drivers will be able to access and review vehicle International Registration Plan documents (IRP Cab Card) and the International Fuel Tax Agreement document (IFTA Card) electronically via the driver handheld device. Annual replacement of these paper documents in the cab will cease with this enhancement. Drivers will need to know how to produce these required document images if requested by law enforcement.

To access these documents, drivers will navigate to the device launch screen and select the Tractor Cab Docs icon. Once opened, links to each document will be visible as shown. The manifested tractor will populate the box automatically but drivers can also manually enter a tractor number and retrieve the Cab Card as needed.

To allow screen rotation, swipe to middle Launch screen and open ABF Mobile Settings, then allow screen rotation.

Please discuss this with all appropriate personnel. Have them initial and retain in your DIRTFT News folder. The DC's only need the supervisor's signature after the information has been discussed with each shift.
